ORPC Alaska 2, LLC; Notice of Preliminary Permit Application Accepted for Filing And Soliciting Comments, Motions to Intervene, and Competing Applications

On March 3, 2014, the ORPC Alaska 2, LLC, filed an application for a successive preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the East Foreland Tidal Energy Project (East Foreland project or project) to be located in Cook Inlet near Nikiski in the Kenai Peninsula Borough, Alaska. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) A series of 150-kilowatt TideGen<sup>®</sup> turbine-generator modules with a combined capacity of no more than 5 megawatts; (2) a 1- to 8-mile-long, 13.5-kilovolt (kV) direct current submarine transmission cable from the module site to an onshore station on the west coast of the Kenai Peninsula; (3) an approximately 0.25-mile-long, 4.16- to 34.5-kV three-phase alternating current terrestrial transmission line connecting the onshore station to a substation site owned by Homer Electric Association; and (4) appurtenant facilities. The estimated annual generation of the East Foreland project would be up to 17.2 gigawatt-hours.
